

the front row quite often. They had one race at Mid-Ohio, which wasn't too far from Detroit, where they just threw all the classes together — Formula Vee and some other formulas. I have a picture of about 12 rows of cars. There was Jim in our Formula Vee on the outside front row. Could building cars to race in Formula 1 be very far away?

In our first year, we had the option of going to Riverside for the SCCA's National Championship in 1964 or going to the Nassau Speedweek. We went to the Bahamas, because you could win more money.

ABOVE The Formula Fords were more expensive to build. Most of the suspension was made from production parts for small European cars. We built only two Lynx Formula Fords, one of which was owned by Tony and Donella Vogel.
